

NEUSS LINE OF IH ENGINES AND POWER UNITS

PROVEN POWER THAT PRODUCES PROFIT

Quality-built IH Diesel engines are the result of years of research, to be exact, 50 years of IH engine research and development. **Built** to give a hard rugged trouble-free service, **Built** for versatility, accuracy and dependability. **And built** to provide a reliable cheap source of power at a competitive price. The very same IH Diesel engines which for many years have been the power supply of the renown D-line wheel and crawler tractors, combines and payloaders, are also available as complete, self-contained power units.

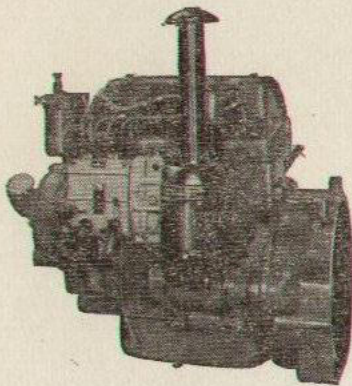

In this age of automation countless opportunities avail themselves for the applications of these conveniently-sized portable units.

For driving: air compressors, electric generators, electric welding machines, saw-mills, silo fillers, slush pumps and winches, are but a few of the practical uses the proven power units can be put to.

They have a great sales potential, so we advise, if you are not already exploiting all your opportunities with our IH power units, to acquaint yourself with the various models and their possible applications.
